

Total Students Served - Descriptive Measures by Program Area

Show an unduplicated count of total students served, broken down by AEBG Instructional Program Area, where a student must have at least one hour attendance in at least one class to be counted in a particular AEBG Program Area. Break down results by descriptive measures according to Ethnicity, Age, Gender and select statuses.

Rules:

1. Courses must be assigned to at least one AEBG Course Label
2. Student must have an enrollment in **at least one** class which is assigned to a particular AEBG Course Label. **One hour of attendance required in at least one class to be counted in that AEBG Program.**
3. Student count is unduplicated by AEBG Program Area, by Descriptive Measure, meaning no matter how many classes a student has taken or enrolled in within that AEBG Program, that student is counted once and only once, within the AEBG Program, within that Descriptive Measure.
4. Ethnicity Rules Apply
 - a. Filipino will be included in Asian category (per AEBG office)
 - b. Any other Ethnicities you added – if you added your own Ethnicity descriptions, all of these students will be counted under “Two or More Races”
 - c. Two or More Races – if student has two or more Ethnicities, that student will appear in this category
5. Missing birthdate will be included in 22 - 34 category.
6. Persons with Disabilities = Disabled Student Type
7. ELLs = English Language Learner or ELL

AEBG is asking for a breakdown of ABE and ASE. If you only assigned courses to the AEBG course label = AEBG I Elementary & Secondary Basic Skills, all results will appear in the combined column and nothing will appear in the ABE or ASE column. You are not required to go back and re-assign each course to the individual ABE or ASE course label.
